PRODUCTION EXPERTISE FOR PREMIUM AND CONTEMPORARY FASHION BRANDS

"We're driven by the principle that what we produce today shapes what's possible for future generations"

Quality tested. Compliance handled. Transparent supply chains. Partnerships built to last.

YOUR BRAND, OUR COMMITMENT

We treat your brand with the same care and precision as our own.
With our extensive experience in textile production, we understand
exactly what it takes to bring a collection to life.

Built around your vision.

WHAT WE DO

WE HELP BRANDS BUILD BETTER COLLECTIONS

From sourcing to product development and production management, Common Era Design helps brands develop collections that align with their creative direction while meeting evolving EU regulations, transparency expectations, and compliance requirements.

Certified materials, transparent supply chains, and product expertise.

GARMENT PRODUCTION

We develop and produce garments through certified production partners across Portugal, Türkiye and Bangladesh. Every product is tested before production begins, while compliance and quality requirements are integrated into every stage of development.

Built-in compliance and product integrity support your brand.

A CLEAR ROUTE FROM FIRST CONVERSATION TO DELIVERY

Get to know each other

Share your goals, understand our process.
Let's get started.

Garment development

Materials, fit and testing.
Patterns, prototypes and production.

Trim development

Trims, branding and packaging.
Durable details, tailored to your brand.

Final check

Pre-production approval of all final details.
Final quality control before delivery.

GARMENT DEVELOPMENT

WHERE THE FINAL PRODUCT IS SHAPED

- **Fit, functionality and durability**
- **Certified materials and trims**
- **Testing, compliance and quality assurance**
- **Prototype refinement and technical validation**
- **Production readiness and final approvals**

The decisions made here define the final product.

LIGHT WOVEN AND KNIT SOLUTIONS

Built around fit, durability and production expertise, Common Era Design supports a wide range of woven and knitwear categories.

Shirts

Blouses

Trousers

Suits

Blazers

Knitwear

Joggers

Childrenswear

Babywear

Caps & Hats

Socks

Corporate

Sportswear

From tailoring to knitwear, every category is supported by the same commitment to consistency and execution.

QUALITY TESTING IS BUILT INTO THE PROCESS

Fabrics and components are reviewed and tested before bulk production. Depending on the product and requirements, testing is conducted through internal quality teams, accredited testing laboratories, or a combination of both. This may include colour fastness, dimensional stability, pilling resistance, abrasion resistance, and seam performance.

Quality decisions are based on data, testing, and years of technical expertise.

MATERIALS

MATERIALS CHOSEN FOR PERFORMANCE

We source certified and preferred materials that support durability, reliability and product performance. Depending on the product requirements, we work with materials such as GOTS organic cotton, GRS recycled fibres, TENCEL™ and ECOVERO™.

Combined with structured product development and full traceability, these choices create a stronger foundation for consistent performance and reliable production outcomes.

The right materials create better products.

TRANSPARENT PARTNERSHIPS, BUILT TO LAST

We work with a trusted network of production partners across Portugal, Türkiye and Bangladesh. We openly share production locations, certifications and relevant documentation, but transparency goes beyond data. Long-term relationships create better communication, faster problem solving and a shared commitment to continuous improvement. Together, we build products, processes and partnerships that evolve over time.

Partnerships over transactions. Built to last.

COMPLIANCE IS INTEGRATED, NOT AN AFTERTHOUGHT

Compliance is built into the development process from the start. As regulations continue to evolve, access to reliable product and supply chain data becomes increasingly important. We provide the documentation, traceability and support brands need to meet current and future requirements with confidence.

Today's compliance is tomorrow's market access.

WHY COMMON ERA DESIGN

- **Product development expertise**
- **Testing built into the process**
- **Transparent production partnerships**
- **Compliance-ready from the start**

From first sketch to market-ready product.
